## ABOUT THE SURVEY

The Winter 2023 Salary Survey report contains annual salary projections for Class of 2023 college graduates. The figures reported are for base salaries only and do not include bonuses, commissions, fringe benefits, or overtime rates. The report provides the detailed salary projections by academic major and degree level, along with breakouts by both industry and geographic region.

Data contained in the report were obtained by surveying NACE employer members from October 5, 2022, through December 5, 2022. A total of 170 surveys were returned-a 19.5 percent response rate. Of those responding, 7.1 percent of respondents were from the New England region, 11.8 percent were from the Plains, 14.1 percent of respondents were from the Far West, 10 percent were from the Southwest, 18.2 percent were from the Southeast, 11.8 percent were from the Mideast, and 27.1 percent were from the Great Lakes. A list of respondents by industry and a partial list of organizations that supplied data for this report can be found in the Appendix.

> Salary Survey (ISSN 1520-8648) is available to individuals holding membership in the National Association of Colleges and Employers; it is also available on a subscription basis. The Salary Survey report is published two times a year-January and July-by the National Association of Colleges and Employers. For more information, see www.naceweb.org/store/ subscription/salary-survey/.

## SALARY SURVEY ISSUES FOR THE CLASS OF 2023

The Winter 2023 Salary Survey report features starting salary projections by major from employer-provided data. This is the first report for the Class of 2023. Data are available by major, job function, industry, and region. There are also data for advanceddegree candidates, including for 35 master's and seven doctoral degree disciplines.

The Summer 2023 Salary Survey report will serve as the final report for the previous year's graduating class. Therefore, the Summer 2023 issue will be the final report on starting salaries for the Class of 2022, while the Summer 2024 Salary Survey issue will serve as the final report for the Class of 2023.

The Summer 2023 Salary Survey report will feature data provided through the national First-Destination Survey initiative; the data represent actual starting salaries (not projections) reported by graduates to their institutions. Data are presented by major, region, and Carnegie Classification.

# HOW TO READ SALARY SURVEY 

## ASSOCIATE / BACHELOR'S / MASTER'S / DOCTORAL

## STARTING SALARY BY ACADEMIC MAJOR \| PAGE 10/11/15/18

In this section, you will find the average starting salary according to the major field of study, with no regard to the type of employer reporting the salary. Refer to this section when you want to know the starting salary for a graduate holding a degree in a specific discipline, such as accounting or computer science.

## STARTING SALARY BY MAJOR AND INDUSTRY | PAGE 21/28

This section shows data first by the major field of study, then by the type of employer (industry) reporting the salaries. Employer types are listed in alphabetical order under each major. See this section when you want the average starting salary reported by a specific type of employer to a graduate earning a degree in a specific major. (Example: Average salary that chemical [pharmaceutical] manufacturing firms are reporting for chemical engineering graduates.)

## STARTING SALARY BY INDUSTRY AND MAJOR | PAGE 31/39

This section contains the same basic information as "Starting Salaries by Major and Industry," but in a different order. You will see data by a specific type of employer (industry), then according to the average salary by major field of study. Industries are arranged in alphabetical order. Majors are listed under each industry in the typical report order by broad category, then alphabetical within the category. Use this section to find the average starting salary reported by a specific type of employer to a graduate in a specific major. (Example: Majors hired by construction firms and their corresponding average starting salaries.)

## STARTING SALARY BY JOB POSITION | PAGE 43/44

In this section, you will find the average starting salary according to job position, with no regard to the type of employer reporting the salary. Refer to this section when you want to know the starting salary for a graduate hired for a specific job position, such as financial specialists or computer occupations.

## STARTING SALARY BY JOB POSITION AND INDUSTRY (BACHELOR'S DEGREE) | PAGE 45

This section shows data first by job position, then by the type of employer (industry) reporting the salaries. Employer types are listed in alphabetical order under each job position. See this section when you want the average starting salary reported by a specific type of employer to a graduate hired for a specific job position. (Example: Average salary that sales positions are projected to earn from finance, insurance, and real estate employers.)

## STARTING SALARY BY INDUSTRY AND JOB POSITION (BACHELOR'S DEGREE) | PAGE 47

This section contains the same basic information as "Starting Salaries by Job Position and Industry," but in a different order. You will see data by a specific type of employer (industry), then according to their reported job positions. Industries are arranged in alphabetical order. Job positions are also listed under each industry in alphabetical order. Use this section to find the projected average starting salary reported by a specific type of employer for a specific job position. (Example: Projected starting salaries reported by miscellaneous manufacturing firms for financial specialists.)

## STARTING SALARY BY REGION AND MAJOR | PAGE 51

In this section, you will find the average starting salary according to the major field of study within seven geographic regions (New England, Mideast, Great Lakes, Plains, Southeast, Southwest, and Far West. Note: For the master's and doctoral degree levels, regions have been combined due to limited data.) The regional data are based upon the locations of the participating organizations that supplied information for the majors within each region. The majors are reported in typical report order by broad category, then alphabetically within the category. Averages are provided strictly by major field of study with no regard to the type of employer reporting the salary. Refer to this section when you want to know the starting salary for a graduate holding a degree in a specific discipline in a regional location, such as mechanical engineering majors hired by participants in the Southwest.

## KEY INSIGHTS

## WINTER 2023 SALARY SURVEY KEY INSIGHTS

## BACHELOR'S DEGREE GRADUATES

- Not all categories of majors for the upcoming Class of 2023 are projected to receive higher starting salaries. For example, the average salary projections for computer sciences ( $-4.0 \%$ ) and social sciences ( $-1.7 \%$ ) are expected to be lower than they were last year.
- Surprisingly, computer sciences majors were the top-paid majors in the past two Winter Salary Survey reports, but due to their $4 \%$ decrease in this year's projection, they have dropped to second in terms of pay. (See Figure 1.) However, this year's decrease may be returning them to pre-pandemic salary levels, as their projected increases in salary for the Classes of 2021 (7.1\%) and 2022 (5.2\%) were significant.
- Despite the drop in salary, computer sciences majors remain in high demand at the bachelor's degree level. In fact, they rose from fourth last year to second on this year's list of top degrees in demand, with two-thirds of responding employers planning to hire them. (See Figure 2.)
- Engineering majors have claimed the top-paid spot, even though their average salary projection is up less than $1 \%$ over last year, nudging them up from $\$ 73,922$ to $\$ 74,405$. Of the 15 reported individual engineering disciplines, one-third are reporting small decreases, with the remaining two-thirds reporting increases. Furthermore, while petroleum engineering majors are the top paid among engineering graduates, their average salary projection of $\$ 82,333$ is $3.4 \%$ lower than last year's projection of \$85,260.
- The average salary projection for math and sciences graduates $(\$ 67,199)$ is also higher, albeit by less than $1 \%$ from last year ( $\$ 66,760$ ). Last year, this group of majors had the highest increase of all reported bachelor's degree categories at $5.4 \%$. Mathematics/statistics majors are the most reported among this group and their average increase of $0.2 \%(\$ 68,572$ to $\$ 68,715)$ appears to be driving the overall movement in salaries.
- Of the top four highest-paid groups of majors, business graduates have the largest projected salary increase. Their overall salary projection is up $2.3 \%$ from $\$ 60,695$ to $\$ 62,069$. Within the individual majors, the average salary projection for accounting majors is expected to see the highest increase (4.5\%), raising their average salary projection from \$59,884 last year to \$62,583 this year.
- Finance graduates are also expected to earn higher salaries, with an average salary projection that is $3.6 \%$ higher than last year ( $\$ 60,776$ to $\$ 62,975$ ). Finance majors are the top bachelor's degree major in demand, with nearly $70 \%$ of responding employers planning to hire them.

## KEY INSIGHTS

## MASTER'S DEGREE GRADUATES

- Unlike bachelor's degrees, all reported categories of majors at the master's degree level show projected increases for the Class of 2023. (See Figure 3.)
- Engineering graduates at this level are projected to be the top-paid majors, having an overall average salary projection of $\$ 86,826$. However, their expected increase in salaries (2\%) is lower than last year's jump (5.9\%).
- The average salary projection for computer sciences majors is also tempered this year at an increase of just $1.6 \%$, which raises their average from $\$ 82,384$ to $\$ 83,681$. This is an improvement over last year, however, when their average salary projection decreased by $3.5 \%$ for the group.
- The demand for computer sciences majors is highest among the reported master's degree majors, with nearly one-quarter of respondents indicating plans to hire them. (See Figure 4.)
- Math and sciences graduates at the master's degree level are projected to receive an average starting salary that is $5 \%$ higher than last year. This is the second year they are reporting a healthy increase; last year, their average projected salary rose $6.7 \%$.
- Although Class of 2022 master's degree business majors saw the largest expected decrease in average starting salaries ( $5.9 \%$ ), the average for Class of 2023 graduates more than makes up for it. Their average salary projection is $13.1 \%$ higher, upping last year's average of $\$ 71,021$ to $\$ 80,305$. Business majors also dominate the list of top majors in demand at the master's degree level, with six out of 10 falling in this category.

6 | WINTER 2023 SALARY SURVEY | NATIONAL ASSOCIATION OF COLLEGES AND EMPLOYERS

## KEY INSIGHTS

## DOCTORAL DEGREE GRADUATES

- Data at the doctoral degree level are extremely limited in this report and, therefore, should be read with caution. There were less than five salary projections reported for each of the seven individual majors contained in the broad categories of computer sciences, engineering, and math and sciences. (See Figure 5.)
- In the reported categories, large increases are expected across the board, with the average salary projection for doctoral computer sciences graduates rising $21 \%$.
- Doctoral degree graduates in math and sciences are also projected to receive considerably higher average salaries. Their 2023 average salary projection of $\$ 100,791$ is $11.4 \%$ higher than last year's $(\$ 90,439)$.
- Engineering graduates are projected to receive higher average salaries, but their increase is more in line with a typical year-over-year comparison. Their average projection of $\$ 110,000$ is up $6.4 \%$ from $\$ 103,423$. In addition, Class of 2022 doctoral engineering graduates had an average salary projection that was up similarly with an increase of 6.5\%.
- The demand for majors at the doctoral degree level is somewhat challenging to measure given the limited data. Computer science tops the list with about $3 \%$ of respondents hiring these graduates at this advanced degree level. (See Figure 6.)

FIGURE 5: AVERAGE SALARIES BY DISCIPLINE / DOCTORAL DEGREES

| BROAD CATEGORY | 2023 SALARY PROJECTION | 2022 SALARY PROJECTION | \% CHANGE |

| Mechanical Engineering | 4 | $2.4 \%$ |
| Physics | 4 | $2.4 \%$ |
| Chemical Engineering | 3 | $1.8 \%$ |
| Mathematics | 3 | $1.8 \%$ |

## JOB POSITIONS

- With last year's Winter 2022 Salary Survey report being the first issue to collect data on specific job positions, this report now provides comparisons in salary projections to last year. (See Figure 7.)
- In terms of highest-paid positions, engineering, computer occupations, physical scientists, and mathematical occupations top the list. This follows suit, as the highest-paid majors at the bachelor's degree level are engineering, computer sciences, and math and sciences.
- As far as changes in salary projections by job position, we see the same movement in salaries by major. However, the increases are more significant in job positions. For example, engineering majors are projected to receive higher average starting salaries by $0.7 \%$; for specific engineering positions, the average salary projection is $6.7 \%$ higher.
- The average salary projection for computer sciences majors is $4 \%$ lower, but for specific computer occupations, the decrease is less than $2 \%$.
- The average salary projections for physical scientists and mathematical occupations are $8.1 \%$ and $4.6 \%$ higher, respectively, while the salary projection for the math and sciences category is an increase of just $0.7 \%$.
