Tracks within the Management Information Systems (MIS) major give students an opportunity to take four courses that focus on a specific area of MIS to enhance their skill and knowledge set as well as their employability. Completion of a track will not be recorded on a student's transcript. Degree and major credit requirements are the same for all students regardless of their chosen track.

Data Analytics Track	Information Security Track	Software Development Track
• MIS 02.338 Design of Database Systems	• MIS 02.327 Network Management	• CS 01.104 Intro Sci Programming
